Reference	TowTrackXL

Properties

Single weight	3.500kg
Load capacity	3.500kg
GVW	3.500kg
Length	694cm
Width	204cm

Description

Soon in stock !! Radio-controlled recovery equipment with caterpillar tracks TowTrackXL is a tracked recovery vehicle for moving vehicles up to 3500 kg. Because you can control the Tow Track remotely, it is ideal for recovering a vehicle in places that are not normally accessible by traditional recovery vehicles. Doosan D16. (Parking garages, narrow terrain, fields, unpaved roads, snow, etc.) especially in places where trucks cannot reach due to their size. TowTrack includes all the technology that makes the movement of vehicles easier! Thanks to advanced technological solutions, this unique tool allows you to move blocked vehicles without having to tow them. Why choose TOWTRACK It can take a vehicle almost anywhere; You can drive him onto a truck with his load; You can use it to park the vehicle; Cheaper solution than other vehicles that do this type of work; It is less bulky and can be maneuvered even in tight spaces with a load.
